CONTENTS TO VOLUME 23

PART 1 SEPTEMBER 1965

One-dimensional flow in an ionizing gas. D. S. BUTLER *page* 1

Propagation of water waves past long two-dimensional obstacles. J. N. NEWMAN 23

The structure of a self-preserving turbulent plane jet. L. J. S. BRADBURY 31

A laminar jet in a rotating fluid. D. M. HERBERT 65

Laminar free convection in a vertical slot. J. W. ELDER 77

Turbulent free convection in a vertical slot. J. W. ELDER 99

A stability criterion for steady finite amplitude convection with an external magnetic field. DIETRICH LORTZ 113

On the stability of steady finite amplitude convection. A. SCHLÜTER, D. LORTZ and F. BUSSE 129

Some effects of stratification and geometry in rotating fluids. G. F. CARRIER 145

Luminescence in supersonic swirling flows. Z. LAVAN and A. A. FEJER 173

Calibration of the Preston tube and limitations on its use in pressure gradients. V. C. PATEL 185

PART 2 OCTOBER 1965

Experiments on the wall-pressure history in shock-reflexion processes. D. BAGANOFF 209

Experimental study of the impingement of a liquid jet on the surface of a heavier liquid. ROBERT B. BANKS and ANUSORNANT BHAVAMAI 229

The swimming of minute organisms. A. J. REYNOLDS 241

On large-amplitude magnetohydrodynamics. CHIA-SHUN YIH 261

Asymptotic expansions for laminar forced-convection heat and mass transfer. Part 1. Low speed flows. ANDREAS ACRIVOS and J. D. GODDARD 273

Similarity of the two-dimensional and axisymmetric boundary-layer flows for purely viscous non-Newtonian fluids. NISIKI HAYASI 293

The three-dimensional laminar boundary layer on a rotating helical blade. J. H. HORLOCK and J. WORDSWORTH 305

Density waves in low-pressure plasma columns. L. C. WOODS 315

Static menisci on the outside of cylinders. D. A. WHITE and J. A. TALLMADGE 325

The effect of two-dimensionality on the suppression of thermal turbulence. J. W. DEARDORFF and G. E. WILLIS 337

On the inviscid stability of the laminar mixing of two parallel streams of a compressible fluid. M. Lessen, J. A. Fox and H. M. Zien *page* 355

Accurate measurements of sphere drag at low Reynolds numbers. T. Maxworthy 369

An experimental determination of the slow motion of a sphere in a rotating, viscous fluid. T. Maxworthy 373

The effect of a non-linear basic temperature profile on the forced flow of a viscous liquid non-uniformly heated from below. P. van den Driessche 385

Propagation of water waves over an infinite step. J. N. Newman 399

Part 3 November 1965

The base-flow and near-wake problem at very low Reynolds numbers. Part 1. The Stokes approximation. H. Viviand and S. A. Berger 417

The base-flow and near-wake problem at very low Reynolds numbers. Part 2. The Oseen approximation. H. Viviand and S. A. Berger 439

Onset of convection in a rapidly rotating fluid sphere. F. E. Bisshopp and P. P. Niiler 459

Effects of viscosity on ship waves. E. Cumberbatch 471

The spectral dynamics of laminar convection. George W. Platzman 481

On the flow of certain orientable fluids between two co-axial cones. P. N. Kaloni 511

On spatially growing disturbances in an inviscid shear layer. A. Michalke 521

Second-class motions of a shallow liquid. F. K. Ball 545

Magnetohydrodynamic flow in rectangular ducts. II. J. C. R. Hunt and K. Stewartson 563

Note on Murray's paper on bubbles in fluidized beds. P. N. Rowe and B. A. Partridge 583

The theory for an oscillating thin airfoil as derived from the Oseen equations. S. F. Shen and P. Crimi 585

Laminar boundary layer on an impulsively started rotating sphere. Edward R. Benton 611

Review

Konforme Abbildung 624

Part 4 December 1965

The steady motion of a particle of arbitrary shape at small Reynolds numbers. R. G. Cox 625

Some experiments on cavities behind disks. G. E. Gadd and S. Grant 645

Low Reynolds numbers flow past an ellipsoid of revolution of large aspect ratio. Yun-Yuan Shi 657

On similarity solutions of the boundary-layer equations with algebraic decay. S. N. Brown and K. Stewartson *page* 673

On some aspects of fully-developed turbulent flow in rectangular channels. F. B. Gessner and J. B. Jones 689

On the stability of the asymptotic suction boundary-layer profile. T. H. Hughes and W. H. Reid 715

The stability of laminar boundary layers at separation. T. H. Hughes and W. H. Reid 737

The velocity of rise of distorted gas bubbles in a liquid of small viscosity. D. W. Moore 749

Self-preserving development within turbulent boundary layers in strong adverse pressure gradients. A. A. Townsend 767

Magnetogasdynamic deflagration under the Chapman–Jouguet condition. A. R. Gordon and J. B. Helliwell 779

Weak waves in relaxing flows. Peter P. Wegener, Boa-Teh Chu and W. A. Klikoff 787

Report on the first European Mechanics Colloquium, on the Coanda effect. R. Wille and H. Fernholz 801
